N9342C Handheld Spectrum Analyzer (HSA) 7 GHz

Data Sheet

Field testing just got easier

www.keysight.com/find/hsa

If you are making measurements in the field, the N9342C handheld spectrum analyzer (HSA) makes your job easier. It's got the features you need for operating in tough field environments, and its measurement performance gives you confidence the job's been done right. The N9342C HSA lets you automate routine tasks to save time and ensure consistent results. Field testing just got easier with the Keysight Technologies, Inc. N9342C HSA.

Your job just got easier:

- Get the features you need in a field-ready instrument.
- Gain confidence in your measurements with benchtop performance in a handheld instrument.
- Innovative task planner (www.keysight.com/find/taskplanner) reduces test setup time by 95%, delivers test automation and consistency, and makes it easy to capture test results, generate reports, and share task plans with others.

Definitions and requirements

This data sheet contains specifications and supplemental information for the Keysight N9342C handheld spectrum analyzer. The differences between specifications, typical performance, and nominal values are described as follows.

Definitions

"Specifications" describe the performance of parameters and apply to temperatures ranging from -10 to 50 °C, unless otherwise noted.

95th percentile values indicate the breadth of the population (> 2) of performance tolerances expected to be met in 95% of the cases with a 95% confidence, for any ambient temperature in the range of 20 to 30 °C. In addition to the statistical observations of a sample of instruments, these values include the effects of the uncertainties of external calibration references. These values are not warranted. These values are updated occasionally if a significant change in the statistically observed behavior of production instruments occurs.

"Typical" describes additional product performance information. It is performance beyond specification that 80% of the units exhibit with a 95% confidence level over the temperature range of 20 to 30 °C. Typical performance does not include measurement uncertainty.

"Nominal values" indicate expected performance, or describe product performance that is useful in the application of the product.

Conditions required to meet specifications

The following conditions must be met for the analyzer to meet its specifications.

- The analyzer is within its calibration cycle.
- Under auto couple control, except when Swp Time Rule is set to Accuracy.
- Any analyzer that has been stored at a temperature range inside the allowed storage range but outside the allowed operating range must be stored at an ambient temperature within the allowed operating range for at least two hours before being turned on.
- The analyzer has been turned on at least 30 minutes.

Certification

Keysight certifies that this product met its published specifications at the time of shipment from the factory. Keysight further certifies that its calibration measurements are traceable to the United States National Institute of Standards and Technology (NIST), to the extent allowed by the Institute's calibration facility, and to the calibration facilities of other International Standards Organization (ISO) members.

Option specifications (continued)		Supplemental information	
Built-in GPS receiver and GPS antenn	a (Option GPS)		
GPS information tagging	Longitude, latitude, and altitude		
GPS antenna	Built-in		
Frequency accuracy with GPS on	± 50 ppb		
External GPS antenna connector	SMA-F	External GPS antenna, N934xC-GPA, is offered as an optional accessory	
USB peak and average power sensor s	support (Option PWP)		
Power sensor supported	Keysight U2020 X-series USB peak and average power sensor		
Frequency range	50 MHz to 40 GHz	Sensor dependent	
Peak power dynamic range	-30 to +20 dBm		
USB average power sensor support (C	Option PWM)		
Power sensor supported	Keysight U2000 Series USB power sensor		
Frequency range	9 kHz to 24 GHz	Sensor dependent	
Dynamic range	-60 to +44 dBm	Sensor dependent	
Security features (Option SEC)			
Security erase Erase the entire user flash memory by writing single character "1" over all memory locations		Non-recoverable	
Port control	Disable/enable LAN port or USB port		
Task planner for test automation (Opt	ion TPN)		
Task plan execution mode	Auto, manual, and manual if fail		
Task plan file	.TPN	Complementary task plan editor is available with HSA PC software	
Number of tasks	Maximum 20 in a single .TPN file		
Measurements supported	Regular spectrum analysis and power suite (channel power, ACPR, and OBW)
